

Hazardous Material Safety Cabinets have the same quality safety features as the cabinets for flammables. All models come with double-wall construction, dual vents, grounding wire connections, adjustable shelves,

For added security, each cabinet comes with handle that does not require manual rotation to engage the mandatory latch. Cabinets include a cylinder lock and key set, or you can choose to use your own padlock. Reflective warning are highly visible under fire conditions or during power outages when illuminated with a flashlight.

Additionally, they include polyethylene trays that sit on top of galvanized steel shelves and a separate polyethylene liner for the bottom sump to resist aggressive chemicals. Easily remove the liner for quick cleaning of drips and leaks. An all epoxy baked-on powder-coat finish, inside and out, provides increased chemical resistance.
