

Simple Data Management With EasyDirect™ DE/RE Software

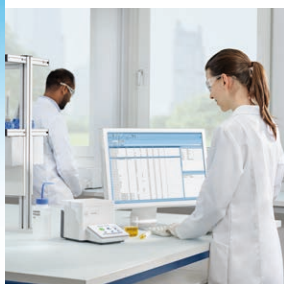

Transfer and store your data
EasyDirect™ software directly collects results of up to three instruments. Easily retrieve and manage data.

Graphical evaluation
For more thorough analysis, inspection and documentation, graphs can be created to monitor samples over time – e.g. to track the quality of chemicals, or the fermentation process of beer.

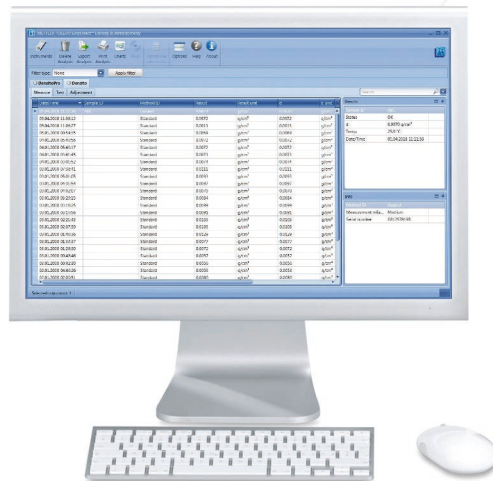

Define your report format
Tailor which data and parameters you want in your report. Simply select from the data and format list and transfer your results to a spreadsheet application of your choice. Print reports on your local or network printer.

Additional calculation*
Analyze a sample and view its result in your preferred scale or concentration: in addition to the instrument's embedded calculation, EasyDirect offers an additional calculation, allowing you to view two different values simultaneously.

*Available only for EasyPlus Density Meters and Refractometers

Data Handling Made Easy

Connect your density meter or refractometer to EasyDirect™ Density & Refractometry Software and improve your data management. Installation and setup are simple and fast, and operation is intuitive.

Enjoy the expanded capabilities of result management, including export to CSV format, printing on a network or local printer, and various data evaluation possibilities.

Download your 45-day free trial version at:

Seamless Communication with EasyDirect™ PC Software

Connect up to three Density2Go Density Meters, Refracto 30PX/GS Refractometers and EasyPlus Density Meters and Refractometers with one license of EasyDirect Density & Refractometry PC software, with any combination of products supported (e.g. one Densito, one Refracto and one EasyPlus Density Meter).

All measured data downloaded to the EasyDirect PC software from the instruments can be easily managed and analyzed.

Technical Specifications

	EasyPlus		Portables	
	EasyPlus Density 	EasyPlus Refractometry 	Density2Go 	Refracto 30PX /GS 
Connectivity	USB A-B	USB A-B	USB A-C	IR
Graphical evaluation	•	•	•	•
Write RFID tags	–	–	DensitoPro only	–
Additional calculation	•	•	–	–
Results storage	Unlimited			
Export	PDF reports CSV Excel Local or network printer			
Languages	English, German, French, Italian, Spanish, Portuguese, Russian, Polish, Turkish, Chinese, Korean, Thai, Bahasa Indonesia			
Maximum number of connected devices	Up to three devices Density meters and/or refractometers in any combination			
Operating system compatibility	Windows 7, Windows 8.1, Windows 10
